

REMARKS

Re Examiner §112 indefiniteness-rejection, Applicant clarifies that the claimed profile comprises personal genetic nucleotide and “related” protein folding structure.

Re Examiner §102/103 rejections over Holden, Applicant respectfully submits that the claimed “related protein folding structure” is neither anticipated nor rendered obvious by such reference. Neither Holden nor the 3/6/06 Board Decision teaches or suggests user profile comprising both personal genetic nucleotide **and** related protein folding structure, as claimed by Applicant.

Respectfully submitted,

Dennis S. Fernandez, ESQ.
